

LACTUBE™

SEMIPERMANENT COLOR UNIKO

ONE STEP EVOLUTION

Tube Up your nails!

Uniko, the only one-step gel polish in tube that empowers non-expert hands to achieve professional results from home.

LE

1. About Us

Founded in 2019, LEB was created to offer a **new manicure experience** that goes beyond mere beauty a moment of **pure joy** without complications. Utilizing advanced technologies and a dedicated R&D department, we develop products that are effective and make every person feel unique and special, enabling everyone to look beautiful every day, more **simply and quickly**.

In our first five years, we have registered 12 patents and received numerous global accolades, including the recognition of the LACTUBE™ system as one of the most exciting innovations in the nail care industry. We were also awarded "Best Gel Polish of the Year" by Beauty Innovation Award, in *Los Angeles*.

2. What is Uniko

Uniko, the only
one-step gel polish
in tube
that empowers
non-expert hands to
achieve
professional results
from home

3. What makes us really... UNIKO?

0 Dexterity Needed

Forget about the mess and struggle of applying classical bottled polish: the auto-dosing tube dispenses the perfect quantity of gel while the brush allows precise color application. No spills, no wastage, no smudges!

1 Step of application / removal

The gel is applied as an easy 4-in-1 system: after one coating, the UV LED lamp completes the process and here you are with your perfect glossy finish in less than a minute. Removal comes just as easy with the acetone-free Remover Pads: perfect occlusion of the nails speeds up the action and gently removes any trace of product.

2 Week of impeccable coverage

All the advantages of a gel polish: up to 14 days of chipping-free and high-shine finish.

12 -Free formula, hermetically sealed from impurities

Vegan, cruelty free, our formula has been elaborated for the utmost respect of your nails and skin. Our patented packaging composed of an airtight tube and single-use brush guarantees the highest hygiene standards and ensures a higher longevity of the formula.

4. How to use

1. PAVE THE NAILS

push back cuticles and
adjust nail length with a file

2. UP THE VALVE

lift the valve and position the
tube perpendicular to the nail

3. USE LACTUBE UNIKO

by pressing on the top of the tube,
dispense a drop and apply it along the
entire surface of the nail

4. USE UV LAMP

complete the application by curing in
your Semipermanent Color Uniko in
your UV/LED lamp

5. What color are your emotions?

Extend the durability of your gel polish with the base coat
